Technology
Grades K-2

Introduction

What is technology? What is your favorite piece of technology? Is it your iPad, your TV, or maybe something silly like a pencil sharpener! In this writing assignment students will write and draw what their favorite piece of technology is, where they use it, and how often.

Learning Objectives

Students will write pieces in which they introduce a piece of technology, draw a visual representation of it, describe where it's used and how often.

Materials Needed

- Bubble Map (plain sheet of paper)
- Pencil and crayons
- iPad

Procedure

1. The teacher will create a [Bubble Map](#) with the class on types of technology they know. The teacher will tell students that today they are going to choose one piece of technology that is their favorite. They will write and draw about that technological tool. The teacher will model writing about a pencil sharpener. The writing should be 1-2 sentences. It may look like the following: I like pencil sharpeners because I use them at school every day.
2. The students should finish their writing and add a picture of what they wrote about.
3. Students will read their written sentences using the app ChatterPix.

Evaluation

Completed writing, ChatterPix recording
